Description - The Error Number Decoder tool lists the message text related to a specific error number.

1- PROCEDURE

1. From the Service Desktop, select **[Utilities]**, **[Error Number Decoder]**, **[Start...]**.
2. The decoder tool starts in a window with the prompt "Please enter the error No. (s or q to quit)".
3. Enter the desired error number; the applicable message text will then be displayed.

REVISION HISTORY

REV	DATE	AUTHOR	PRIMARY REASONS FOR CHANGE
0	Aug. 5, 1998	M. Whitlow	Initial conversion from Toolbook to Word.
1	Oct. 8, 1999	M. Keber	Added proprietary heading to top of page.
2	Aug. 16, 2000	M. Jones	Updated "Error Number Decoder" name in step 1.
